SKILLS

Backend

Java 11 · Spring Boot · Spring Data JPA · Hibernate · QueryDSL · MapStruct · Liquibase · Spring Security · OAuth2 · JWT · WebFlux WebClient · Quartz · RESTful API

Microservices

JHipster · Eureka · Spring Cloud Config · OpenFeign · API Gateway · Kafka

Data & search

MySQL 5.7 / 8 · Elasticsearch 7 · Redis · AWS S3 · Oracle · PostgreSQL

Architecture & patterns

Event-driven · Transactional Outbox · Saga · Optimistic locking · Sharding-ready queries

Integration & documents

VDXP · edXML · C06 · VNeID · MISA · Signing · stamping · AI OCR · QR · PDFBox · JAXB

Nguyễn Văn Hòa

Backend Developer · Java Spring Boot · Microservices

NVH

PROFILE

Backend developer with 4+ years of experience who started in frontend and led the frontend team at 84Soft. Now building digital-government systems at FPT IS: document lifecycle management (eDLM), task assignment (eTask) and civil judgment enforcement (THADS-eTCTHA, client: Ministry of Justice) on a Spring Boot, Kafka, Elasticsearch and MySQL microservice stack. Strength: integrating large systems while keeping data intact across every connection.

INTEGRATION & DATA INTEGRITY

- Connected 8 systems: national interconnection axis, eTask, signing/stamping, AI OCR, C06/VNeID, MISA, e-receipts, ministry reconciliation.
- Publish after commit through an outbox; saga logs in their own REQUIRES_NEW transaction so rollbacks keep the trail.
- Acknowledge only after everything is stored; forward-only status with @Version optimistic locking.
- An ID per round with stored request/response; one consumer group per service; per-recipient resend on failure.

EXPERIENCE

FPT Information System (FPT IS)

10/2025 – present

Full-Stack Developer · backend focus

Building and maintaining core digital-government systems on a Spring Boot microservice architecture. 1,900+ commits across 5 repositories (git log, 10/2026).

eDLM Document lifecycle management system

- Outgoing documents: submission, digital signing, stamping, issuance and supplementary issuance, in-flow recall, signing on behalf.
- National document interconnection axis (edXML): moved axis logic into a dedicated vdxp service over Kafka; per-recipient tracking, resend and statistics.
- Incoming documents: department reception, duplicate detection and merge, QR/OCR scanning via an AI service; cross-document search on Elasticsearch.

Stack: Spring Boot · Kafka · Elasticsearch · MySQL · Liquibase · QueryDSL · AWS S3

THADS-eTCTHA Civil judgment enforcement cases · client: Ministry of Justice

- Cases, parties and enforcement operations; enforcement cash flow (receipts, payments, seizures, refunds) with history and search indexes.
- Party verification via C06/VNeID population data on a dedicated executor with hard timeouts; MISA document sync, e-receipts and ministry reconciliation.

Stack: Spring Boot · Microservices · Kafka · Redis · Elasticsearch · MySQL · AWS

eTask Task assignment system · integrated with eDLM

- Each document action creates or updates eTask projects and tasks over Kafka with an outbox, saga logs and versioned status configuration.

Stack: Spring Boot · Kafka · MySQL · OpenFeign

SKILLS

Frontend

TypeScript · React · Next.js · Angular · Vue · Redux Toolkit · Tailwind CSS · Node.js · NestJS

Tooling

Git · GitLab · Maven · Docker · Postman · Swagger · Jira · Figma

EDUCATION

05/2024 – present
Posts and Telecommunications Institute of Technology (PTIT)
B.Eng. Software Engineering · eLearning

05/2021 – 11/2023
Fullstack Edu (F8)
Full-stack Development · job-ready programming

08/2020 – 09/2022
ITPlus Academy
Full-stack Development · project-based

WAYS OF WORKING

- Analysis & estimation
- Task allocation, frontend team lead
- Clear hand-over documentation
- Teamwork, self-driven, eager to learn

LANGUAGES

- Vietnamese: native
- English: basic (technical reading)

EXPERIENCE (CONTINUED)

84Soft Technology and Investment JSC

03/2022 – 05/2025

Full-Stack Developer / Frontend Team Lead

Analysed, built and maintained web applications; led the frontend team (planning, allocation, process) and contributed to the backend.

Reavol	Digital-content e-commerce	FE Lead
CakeAI	Multi-platform AI assistant	Full-stack · FE Lead
MyID	Carrier-based authentication	Full-stack · FE Lead
SmartQA	AI audio analysis, fraud detection	Full-stack · FE Lead
MeetLaw	Legal learning by real cases	FE Lead
Art Contest	Community drawing contest (Vifolac)	FE Lead
Vtbay · Vegiare	Flight search and booking	FE · Full-stack
HETEAC	Payment system (InterITS)	FE

Stack: React · Next.js · TypeScript · Spring Boot · NestJS · MySQL · Firebase · AWS · OpenAI API

International IT Solutions JSC

07/2024 – 09/2024

Onsite · Frontend Developer

Built web interfaces and worked with the backend team on accurate API integration.

PERSONAL PROJECT

Personal portfolio Angular 21 · Tailwind CSS 4 · GSAP · Three.js · Firebase

- Bilingual site with light/dark themes; lazily loaded 3D scene via @defer, pinned horizontal scroll, Ctrl+K command palette, honours prefers-reduced-motion.
- Build-time environment config; Firebase Analytics, Performance and Remote Config run only after consent; Firestore contact form with create-only rules; deployed to GitHub Pages via GitHub Actions.
